4.1 Slides

311-workupdate

4.1.1 DONE slides for ice data processing

5 DONE spacemacs

5.1 project

1. SPC+p+p

2. SPC+p+f: file in project

3. SPC+p+t

4. SPC+*

5. SPC+/

6. SPC+s+s

7. SPC+j+i

8. SPC+j+f

9. SPC+j+l

10. SPC+p+': open terminal

11. SPC+p+.: project layout

5.2 Dired

SPC+a+d: S-c: copy S-r: rename or move S-d: delete !: open with external apps

5.3 Evil

1. fd: return vi normal

2. [e= line up

3.] e= line down

4. SPC+b+e erase content

5. SPC+f+r recent open file

6. SPC n +/-

5.4 Search

SPC+s+g: SPC+s+g+p: SPC+/: SPC+*: SPC+s+g+b:

5.5 Theme and Face

```
(setq theming-modifications
      '((seti
        (lsp-face-highlight-read: backgroud "#333333")
        )))
```

the varialbe value of 'lsp-face-highlight-read' can be get from 'M-x describe-face'

5.6 org

5.6.1 DONE todo alert

refer to emach-china or previous init file for gtd
    use appt package, the time to event is displayed at modeline.

5.7 cpp

5.8 python

5.9 translate

5.9.1 sdcv

the package on elpa is not the latest version which show ugly translate results.
copy the github file sdcv.el to replace the target.

5.9.2 insert translated

5.9.3 enable english helper

5.10 spacemacs layers

xinstool layer

5.11 figure

5.12 emacs

`https://manateelazycat.github.io`

1. Emacs ~/.emacs /usr/share/emacs/common/share/emacs/site-lisp/site-start.el ;; mac

2. Emacs

5.13 elisp

- file-name-as-directory:
- mapconcat

6 DONE Org Downloads

6.1 drag

1. drag a figure to org mode

2. the figure is moved to target folder and inserted to org file, with new prefix

(setq-default org-download-image-dir "~/Downloads")

6.2   screenshot

(setq org-download-screenshot-method "screencapture -i %s")
